ASSESSMENT

# IT Organizational Review

Nelson Pires · Fractional CIO / CTO · info@swpconsultant.ca

*"We've grown fast. I'm not sure our IT function is built for where we're headed."*

Your technology function should be an engine for the business — not a source of friction, risk, or confusion. When organizations scale quickly, IT often lags: unclear ownership, misaligned resources, fragile processes, and governance gaps that accumulate quietly until they become costly. This engagement gives leadership a clear, independent picture of where the IT function stands today — and a concrete path forward.

## SCOPE

- Organizational structure, roles and reporting lines
- Governance model and decision-making clarity
- Team capacity and skill alignment
- Delivery practices and service levels
- Leadership and business alignment

## DELIVERABLES

- Executive findings report
- Organizational recommendations with rationale
- Prioritized action plan (quick wins and longer-term)
- Optional: oral debrief with leadership team

**Typical duration: 4–5 weeks**

*Scope and investment calibrated to your organization's size and context.*
